BRITISH MEDICAL BULLETIN Volume 63 2002

New developments in hearing and balance

Scientific Editors: Brian C J Moore, Jonathan Ashmore, Mark Haggard

1 Preface
Jonathan Ashmore

5 The molecular architecture of the inner ear
Andrew Forge and Tony Wright

25 Cochlear pathology, sensory cell death and regeneration
Yehoash Raphael

39 Sensory organ development in the inner ear: molecular and cellular mechanisms
Jane Bryant, Richard J Goodyear and Guy P Richardson

59 Biophysics of the cochlea – biomechanics and ion channelopathies
Jonathan Ashmore

73 Hereditary deafness and phenotyping in humans
Maria Bitner-Glindzicz

95 Microelectrode and neuroimaging studies of central auditory function
Alan R Palmer and A Quentin Summerfield

107 Central auditory pathologies
Timothy D Griffiths

121 Psychoacoustics of normal and impaired hearing
Brian C J Moore

135 Auditory processing and the development of language and literacy
Peter J Bailey and Margaret J Snowling

147 Electronic aids to hearing
Stuart Gatehouse

157 Application of new biological approaches to stimulate sensory repair and protection
Matthew C Holley

171 Auditory development and the role of experience
David R Moore

183 Cochlear implants and brain stem implants
Richard T Ramsden

195 Mechanisms of tinnitus
David M Baguley

213 Under-rated neuro-otological symptoms: Hoffman and Brookler 1978 revisited
Adolfo M Bronstein

223 Oto-acoustic emissions, their origin in cochlear function, and use
David T Kemp
